Design Solution Document

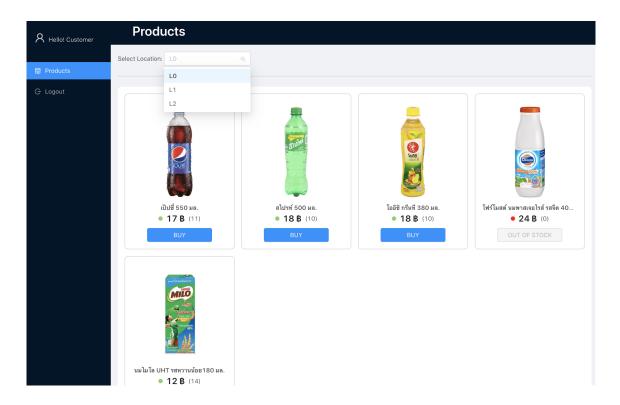

The system contains:

• 4 main pages consist of the login page, products page, locations page and notification page.

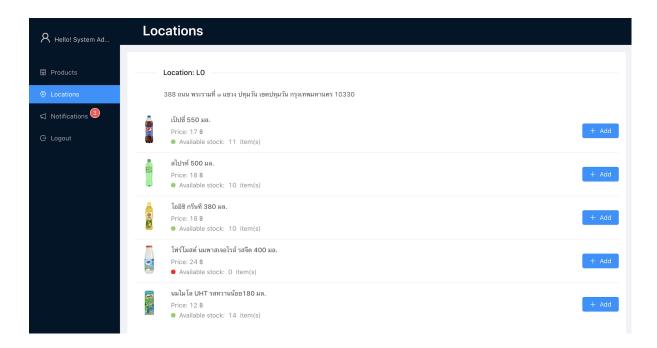

Login page

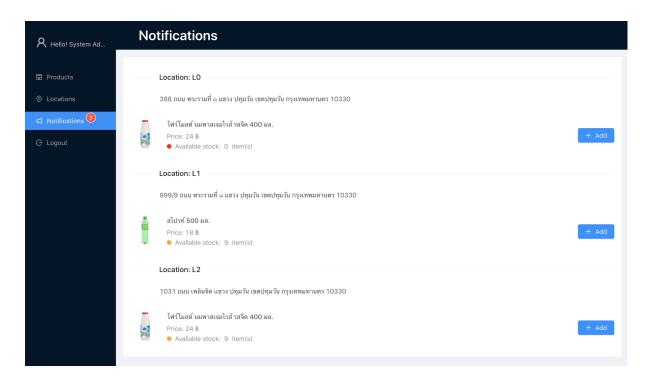

Products Page

Locations Page

Notifications Page

Customer Role/ System Admin Role

Customer Role

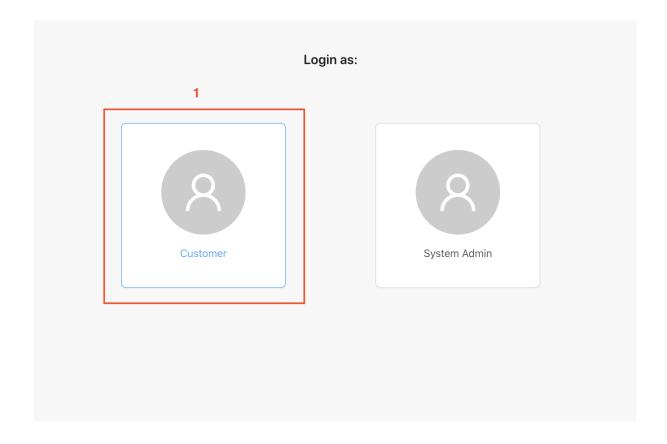

Customers can see only the products page and can select a location where they would like to buy the product.

System Admin Role

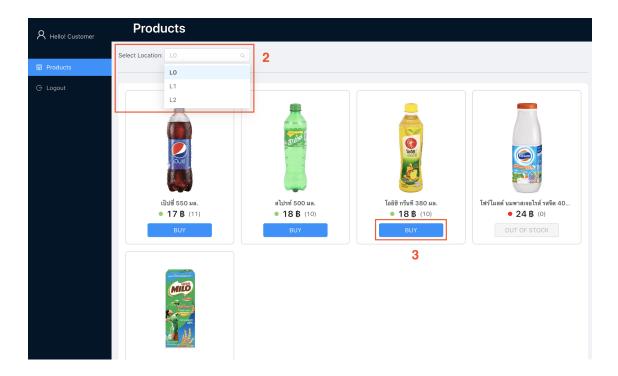

System admin has the right to access all 4 pages and can see the locations with the details of products. System admin can also add the products to any location. The system will send the notification to system admin when the products are less than 10 items. Therefore, the system admin can track the stock of products in all locations before they are out of stock.

As a Customer

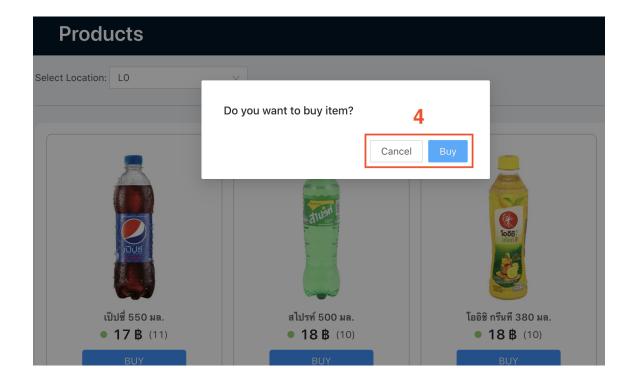

1. Select a "Customer" role.

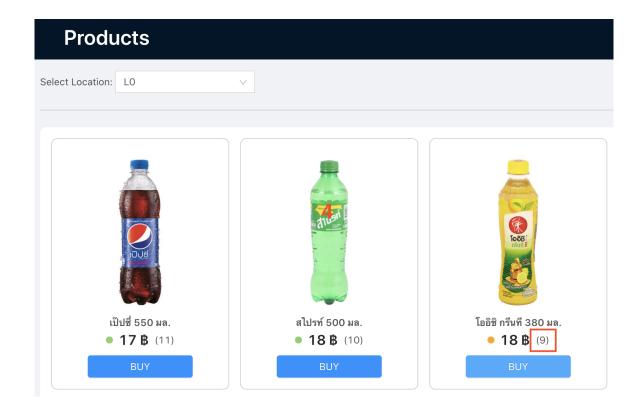

- 2. Select a location.
- 3. Click the button to buy the product.
 - means "In Stock".
 - means "Nearly Out of Stock".
 - means "Out of Stock" (cannot buy and button will be disabled).

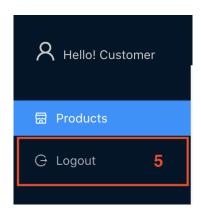

4. After clicking the "Buy" button, product quantity will be decreased.

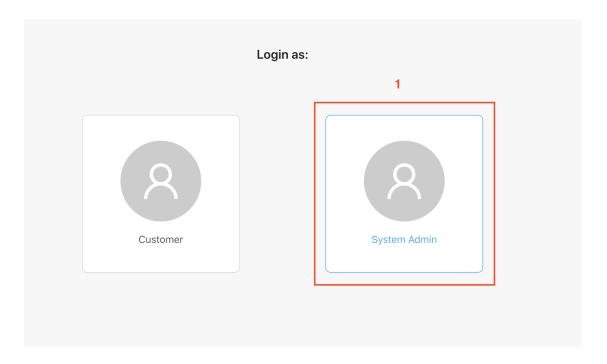

5. Click "Logout" to go back to the login page.

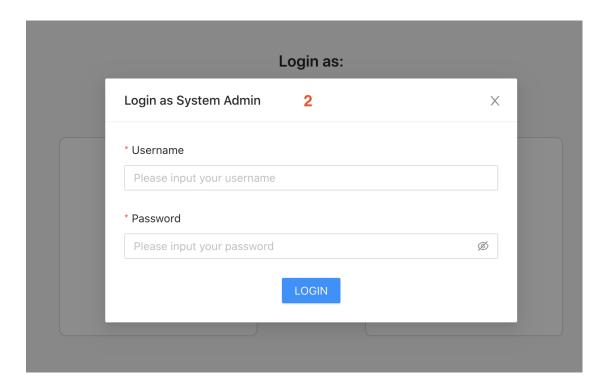

As a System Admin

<u>Login</u>

1. Select a "System Admin" role.

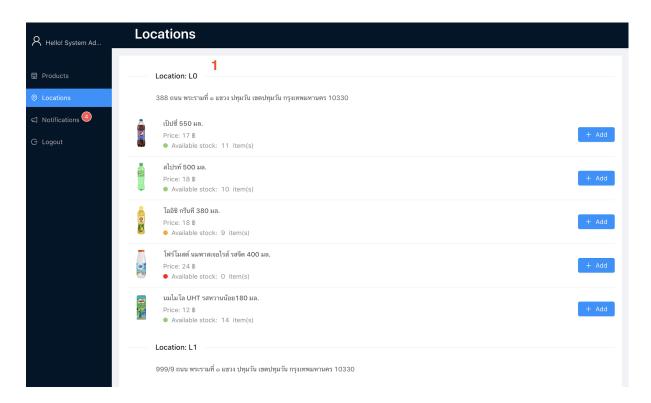

- 2. Enter username and password.
 - use username: admin and password: admin for testing.

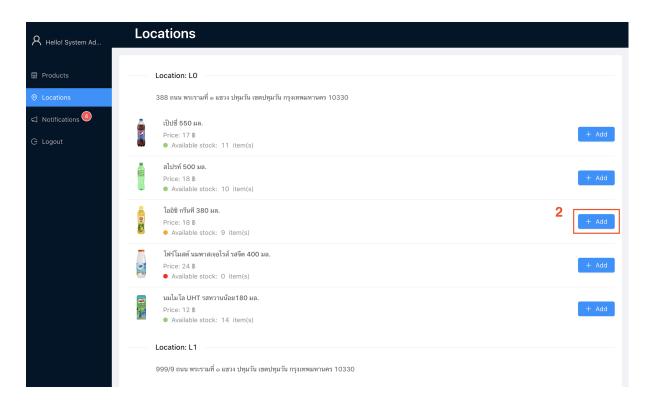

Adding Products

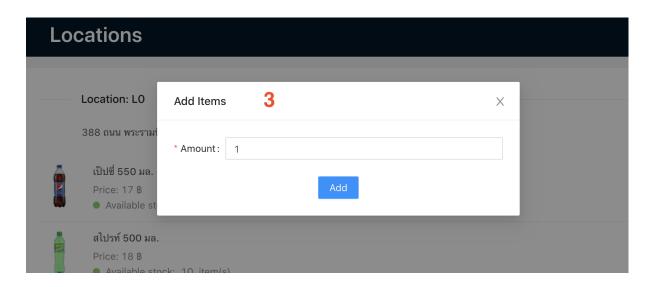

1. Click the "Locations" menu to see all locations.

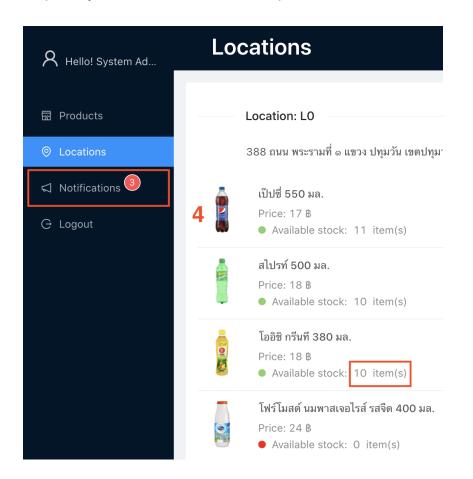

2. Click the "Add" button.

- 3. Enter the amount then click the "Add" button.
 - Default value is 1, min value is 1 and max value is 10.

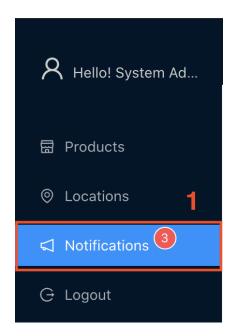

4. Product quantity and notifications will be updated.

Notifications

can add products on this page as well.

1. After buying, if product quantity is less than 10 or out of stock, notifications will be shown on sider menu.

2. Click the "Notifications" menu to see all details.
